**WPB Enterprises, Inc.**

## EXPERIENCE COUNTS!

Radon is a radioactive gas that seeps into homes from the earth. Radon is now recognized around the world as the leading cause of lung cancer in non-smokers.

WPB Enterprises, Inc. is the **OLDEST** and most **EXPERIENCED** radon mitigation company in Pennsylvania. **WPB GUARANTEES** to bring your radon levels to below the PA Dept. of Environmental Protection's action level of 4 pCi/l.

Bill Brodhead, founder of the company in 1983 has installed over 8000 systems in Pennsylvania, safely mitigating homes with radon levels as high as 3000 pCi/L. WPB has been certified by PA DEP since 1989 (cert #0584). Bill's PA DEP Certification # is 0736.

WPB does not sub-contract the radon installation. The PA State law requires that a certified individual must visit your house to design the radon system before it is installed. All WPB jobs are installed by Bill Brodhead or by his assistant, Mark Dilts, (PA DEP Cert # 2159) who has been installing systems for WPB for over 13 years. WPB is **FULLY INSURED** and has a HIC license #PA010145 through the PA Attorney General's office. All companies must display their HIC License as proof of insurance.

The US government has sent Bill to Alaska, Guam, Korea, and Okinawa, to study and install radon systems in housing on US bases for the Navy, Air Force and Marines.

Bill has also developed and presents radon workshops supported by US EPA and sponsored by Rutgers Regional Radon Training Center in New Jersey and throughout most of Pennsylvania. Bill has **PUBLISHED** over a dozen research papers for the Annual Radon Symposium.

Visit WPB web site at [www.wpb-radon.com](http://www.wpb-radon.com) or google "Bill radon" to see Job photos, information on all aspects of radon or review over 250 customer comments
